CAREER SUMMARY:

Full-Stack AI Engineer with expertise in architecting autonomous multi-agent systems and scalable web applications. Proficient in the MERN stack, Next.js, and Python, with a specialized focus on integrating LLMs (Gemini, Claude) and Prisma/PostgreSQL for high-performance data handling. Proven track record in developing AI-driven products like Safar AI (1.1K+ users) and Haven, optimizing workflows through Redis caching and prompt engineering. Combines technical depth with a 3D Artist's eye for "pixel-perfect" UI using GSAP and Framer Motion.

SKILLS:

- Languages: JavaScript, Python , TypeScript
- Frontend: React.js, Tailwind CSS, Next.js , HTML, CSS , Framer Motion, GSAP, Lenis
- Backend: Firebase, Node.js, Prisma ORM, Redis, REST APIs, Express.js, JWT
- Databases: MongoDB, Firebase , PostgreSQL
- Tools: Git, GitHub, Postman , Vercel
- AI & LLM Integration: LLM API Implementation (Gemini, Claude, OpenAI), Prompt Engineering, Agentic Workflows, AI-driven Data Filtering

Experience:

Full-Stack AI Engineer | Persist Ventures

January 2026 – Present

- **Architecting end-to-end AI solutions**, integrating LLMs and generative models into full-stack applications to automate complex workflows.
- **Developing "Haven" (formerly Janas AI)**, a real-time real estate platform, focusing on seamless user experiences and intelligent data filtering.

- **Optimizing system performance** and scalability for AI-driven features, ensuring low-latency responses and high reliability.
- **Collaborating on Safar AI Trip Planner**, utilizing advanced prompt engineering and data structuring to deliver personalized travel itineraries.

Full-Stack Developer | Kite Info

August 2025 – February 2026 (7 Months)

- **Engineered high-conversion landing pages and websites**, prioritizing "pixel-perfect" design and smooth, cinematic animations to enhance user engagement.
- **Developed and deployed custom Content Management Systems (CMS)**, empowering non-technical clients to manage complex site architectures independently.
- **Bridged the gap between design and code**, utilizing modern frameworks to ensure responsive, accessible, and high-performance web interfaces.
- **Streamlined development workflows** for rapid deployment of marketing sites, reducing time-to-market for key business initiatives.

Web Development Intern | The Developers Arena

April 2025 – September 2025 (6 Months)

- **Contributed to the development of responsive web applications**, utilizing React.js and Tailwind CSS to transform UI/UX designs into functional, high-performance interfaces.
- **Assisted in integrating RESTful APIs**, streamlining data flow between front-end components and back-end services to enhance application interactivity.
- **Participated in agile sprint cycles**, collaborating with senior developers on code reviews, debugging, and the deployment of feature updates for client projects.
- **Optimized website assets and performance**, improving page load speeds and ensuring "pixel-perfect" responsiveness across diverse mobile and desktop devices.

PROJECTS:

Haven– AI-Powered Real Estate | [Link](#)

Tech Stack: Next.js, Firebase, AI Agents, Google Gemini API, Zillow API

- Helped investors find high-potential properties instantly through AI-driven deal scouting and analysis.
- Automated property research and valuation, reducing manual effort and decision time for investors.
- **Virtual Staging:** Utilizes Gemini AI to digitally furnish and decorate empty property photos, allowing potential buyers to visualize a home's full potential in various interior styles.
- **Dream House Match:** Employs advanced AI filtering and location intelligence to analyze user lifestyle preferences and automatically recommend properties that align with their "must-have" criteria.
-
- Delivered transparent, data-backed insights with explainable “Why this deal?” reasoning for every property.
- Improved investment accuracy and speed using multi-agent collaboration for scouting and underwriting.

Safar AI – AI Trip Planner | [Link](#)

Tech Stack: React.js, Firebase, Gemini API, Google Place Api

- Built a smart travel planner that auto-generates personalized itineraries using Gemini AI.
- Automated hotel search, route planning, map-based navigation, reducing planning time by 60%.
- Integrated Firebase for user auth and Google Place API for location intelligence.

AI Social Media Agent

Tech Stack: React.js, Firebase, Hugging Face (Mistral-7B), Twitter API

- Created an agent that posts auto-generated captions based on travel data from Firebase.
- Reduced manual content creation time by 90% for social media campaigns.
- Used Mistral-7B to generate tone-aligned captions and emojis within Twitter limits.

EDUCATION:

- B.Tech in Computer Science & Engineering
International Institute of Technology and Management, Sonipat | 2021 – 2025
- Senior Secondary - Tagore International School | 71%
- Secondary - Tagore International School | 70%
